

A woman with voluminous, curly, light brown hair is sitting on a wooden pier. She is wearing a white, square-neck, spaghetti-strap crop top and a light blue, pleated skirt. She is looking towards the camera with a slight smile. The background is a clear blue sky and turquoise ocean. The word "INDIQUE" is overlaid in large, white, outlined letters across the center of the image.

Spring 2017

Spring 2017

Feature Highlights: *Bounce Organic Curl*

Spring is all about curls and color! Brighten up this season and enjoy the benefits of virgin hair extensions. Have your stylist take your look to the next level with an ombre, sombre, color melt, highlight or balayage.

"I was super excited when we released the Organic Curl texture in 2010. There was nothing quite like it on the market. At the time, only synthetic hair was available with this type of tight curl pattern. It couldn't be colored or shampooed, nor was it soft to touch. Organic Curl provided the perfect texture with a natural look and most importantly the cuticle was intact. The versatility of this hair has played a major part in creating my signature look!"

- **Ericka Dotson, Co-Founder & Creative Director**

"When it comes to custom color, Indique is by far the best hair extension line! I love it so much because of the way it processes color just like my client's natural hair would. I have colored every texture they offer from jet black to multidimensional blondes, even fun colors like blue and purple. As a colorist and extension specialist, part of my success can be attributed to giving my clients the desired end result. That wouldn't be possible without quality hair extensions."
